

A List of Music Halls in London

Courtesy of Diana Howard's researches

They are listed in date order. The first date represents the first known mention (or the first issue of a Licence) and the second date is the last known licence issue date. Many of these would have been very small venues, and almost all of them would have been either a room inside a pub or a room built as an extension to a pub. Listing in date order gives an immediate insight into how quickly the music hall growth developed. And how quickly it tapered away once the Variety Theatres came into existence. (Many of these will have a separate and fuller entry in the main book — check the full Index)
